MICROSOFT 365 TENANT
fabrikam.onmicrosoft.com

SPF, DMARC, DKIM, MTA-STS and TLS-RPT for each of the tenant's domains, from public DNS.

Filtered view. Domains: 1 of 2 rows, DMARC is Missing. The headline figures cover every row.

Domains	Domains to fix	DMARC not enforced	DKIM not signing
2	1	2	1
1 receive mail	SPF, DMARC or DKIM missing or weak	Spoofed mail from these is still delivered	Mail sent from Microsoft 365 isn't signed for these

Domains 1

SPF, DMARC and DKIM stop other people sending email as the client's domains. MTA-STS and TLS-RPT make other servers deliver mail to them encrypted, and report when they can't.

Flag	Domain	Receives mail via	SPF	DMARC	DKIM	MTA-STS	TLS-RPT	What to fix
Low	parked.example	Doesn't receive mail	Missing	Missing	Not needed	Not needed	Not needed	Needs a "v=spf1 -all" record saying it sends no mail, or anyone can send as it; Needs a DMARC p=reject record, or spoofed mail from it is still delivered

Published records 2

Domain	SPF record	DNS lookups	DMARC record	MTA-STS policy	TLS-RPT record	MX
fabrikam.example	v=spf1 include:spf.protection.outlook.com -all	1	v=DMARC1; p=none; rua=mailto:dmarc@fabrikam.example	None	None	fabrikam-example.mail.protection.outlook.com
parked.example	None	–	None	None	None	None
