Who owns, administers and can reach each SharePoint site: ownerless sites, guests, and sites open to everyone in the organisation.

Filtered view. Who can access each site: 3 of 5 rows, Flag is No flag. The headline figures cover every row.

Sites with no owner	One owner only	Guests with access	Open to everyone in the organisation	Sites
1	2	3	1	5
Nobody enabled owns them	A leaver would leave them orphaned	On 2 sites	Everyone or Everyone except external users	Not counting OneDrives

Sites needing an owner 3 1 to review

A site with no enabled owner has nobody to approve access or answer for its content; one owner is one leaver away from that. Owners are the Microsoft 365 group's owners, or for a site with no group its site administrators and the people in its owners group.

What each site grants and to whom: the Microsoft 365 group's owners and members, what the default document library gives to site groups, groups and people, and guests given access on the site. Full control, Edit and View are the owner, member and visitor access Microsoft reports; the Site permissions report shows SharePoint's own permission levels (Full Control, Edit, Read).
