3 clients

How people sign in and how strong that is: methods by strength, admins without phishing-resistant MFA, the methods policy, and password age and expiry.

**Filtered view.** Password age: 109 of 109 rows, 1 column hidden. The headline figures cover every row.

## Password age 109

When each enabled member's password was last set. An old password matters most without MFA; an account that has never signed in may still have the password it was created with. Problems first, then oldest first.

| Client            | Account                       | Never expires | Synced from on-premises | Last sign-in | MFA set up | What it means |
