How people sign in and how strong that is: methods by strength, admins without phishing-resistant MFA, the methods policy, and password age and expiry.

**Filtered view.** Strongest method: 4 of 12 rows, Client is Contoso Legal LLP, 1 column hidden. The headline figures cover every row.

Strongest method 4 2 to review

Each enabled member counted once, by the strongest method they have.

By strength

|                            |  |   |
|----------------------------|--|---|
| Phishing-resistant         |  | 4 |
| Authenticator app or token |  | 9 |
| Phone (SMS or voice call)  |  | 3 |
| None                       |  | 3 |

| Flag     | Client            | Strength                   | Admins | Share of members | What it means                                                                      |
|----------|-------------------|----------------------------|--------|------------------|------------------------------------------------------------------------------------|
|          | Contoso Legal LLP | Phishing-resistant         | 0      | 21%              | Bound to the real Microsoft sign-in page, so a fake page can't relay it.           |
|          | Contoso Legal LLP | Authenticator app or token | 1      | 47%              | Strong, but a convincing fake sign-in page can relay a code or push approval.      |
| ● Medium | Contoso Legal LLP | Phone (SMS or voice call)  | 0      | 16%              | Weakest second factor: texts and calls can be intercepted or moved to another SIM. |
| ● Medium | Contoso Legal LLP | None                       | 1      | 16%              | No second factor: the password alone gets in.                                      |
