Who owns, administers and can reach each SharePoint site: ownerless sites, guests, and sites open to everyone in the organisation.

Filtered view. Who can access each site: 1 of 5 rows, Guests is 1. Site administrators: 5 of 5 rows, 1 column hidden. The headline figures cover every row.

Sites with no owner 1 Nobody enabled owns them	One owner only 2 A leaver would leave them orphaned	Guests with access 3 On 2 sites	Open to everyone in the organisation 1 Everyone or Everyone except external users	Sites 5 Not counting OneDrives
---	--	--	--	---

Not checked. Members of SharePoint groups on 1 site with no Microsoft 365 group aren't listed here; those sites show their site administrators and what the default library grants. The Site permissions report lists every SharePoint group and its members once the client approves the SharePoint permission.

Sites needing an owner 3 1 to review

A site with no enabled owner has nobody to approve access or answer for its content; one owner is one leaver away from that. Owners are the Microsoft 365 group's owners, or the site administrators of a site with no group.
