SharePoint groups 5

Each site's SharePoint groups: its owners, members and visitors groups and any others, what each grants on the site and who is in it. A guest in an owners group has full control of the site.

Site	Group	Role on the site	Permission level	Members	Guests	Group owner
Clients	Clients Owners	Owners	Full Control	1	None	Clients Owners
Finance	Finance Owners	Owners	Full Control	1	None	Finance Owners
Marketing	Marketing Owners	Owners	Full Control	1	None	Marketing Owners
Operations	Operations Owners	Owners	Full Control	1	None	Operations Owners
Staff Intranet	Staff Intranet Owners	Owners	Full Control	1	None	Staff Intranet Owners

Lists and libraries with their own permissions 2

Lists and libraries that stopped inheriting their site's permissions, so the site's groups don't say who can open them. Each is worth a look: the reason is often a one-off that was never undone.

Flag	Site	List or library	Type	Items	Who can open it
● Low	Clients	Engagement letters	Library	38	Clients Owners (Full Control), Clients Members (Contribute), D Mason (Read)
	Finance	Payroll	Library	64	Finance Owners (Full Control), Thomas Clarke (Edit)

Subsites with their own permissions 1

Subsites that don't inherit their parent site's permissions.

Site	Subsite	Who can open it
Staff Intranet	HR	Staff Intranet Owners (Full Control), Thomas Clarke (Edit)

Access by person 30 1 to review

Everyone who can get into at least one site, through any group or directly, with guests and outside accounts first. Microsoft 365 and security groups are opened up where the Groups collection has their members.
