Who has access to each site 1

Every permission level on each site, with SharePoint groups opened up into their members. Permissions on single files and folders are in File and folder permissions.

SharePoint groups 15

Each site's SharePoint groups: its owners, members and visitors groups and any others, what each grants on the site and who is in it. A guest in an owners group has full control of the site.

Lists and libraries with their own permissions 2

Lists and libraries that stopped inheriting their site's permissions, so the site's groups don't say who can open them. Each is worth a look: the reason is often a one-off that was never undone.

Flag	Site	List or library	Type	Items	Who can open it
● Low	Clients	Engagement letters	Library	38	Clients Owners (Full Control), Clients Members (Contribute), D Mason (Read)
	Finance	Payroll	Library	64	Finance Owners (Full Control), Thomas Clarke (Edit)

Subsites with their own permissions 1

Subsites that don't inherit their parent site's permissions.

Site	Subsite	Who can open it
Staff Intranet	HR	Staff Intranet Owners (Full Control), Thomas Clarke (Edit)

Access by person 31 1 to review

Everyone who can get into at least one site, through any group or directly, with guests and outside accounts first. Microsoft 365 and security groups are opened up where the Groups collection has their members.
