## SharePoint groups 3

Each site's SharePoint groups: its owners, members and visitors groups and any others, what each grants on the site and who is in it. A guest in an owners group has full control of the site.

| Site       | Group               | Role on the site | Permission level | Guests | Group owner       |
|------------|---------------------|------------------|------------------|--------|-------------------|
| Operations | Operations Owners   | Owners           | Full Control     | None   | Operations Owners |
| Operations | Operations Members  | Members          | Edit             | None   | Operations Owners |
| Operations | Operations Visitors | Visitors         | Read             | None   | Operations Owners |

## Lists and libraries with their own permissions 2

Lists and libraries that stopped inheriting their site's permissions, so the site's groups don't say who can open them. Each is worth a look: the reason is often a one-off that was never undone.

| Flag  | Site    | List or library    | Type    | Items | Who can open it                                                             |
|-------|---------|--------------------|---------|-------|-----------------------------------------------------------------------------|
| ● Low | Clients | Engagement letters | Library | 38    | Clients Owners (Full Control), Clients Members (Contribute), D Mason (Read) |
|       | Finance | Payroll            | Library | 64    | Finance Owners (Full Control), Joseph Morris (Edit)                         |

## Subsites with their own permissions 1

Subsites that don't inherit their parent site's permissions.

| Site           | Subsite | Who can open it                                            |
|----------------|---------|------------------------------------------------------------|
| Staff Intranet | HR      | Staff Intranet Owners (Full Control), Joseph Morris (Edit) |

## Access by person 21 1 to review

Everyone who can get into at least one site, through any group or directly, with guests and outside accounts first. Microsoft 365 and security groups are opened up where the Groups collection has their members.
